Board :W.B.B.S.E marks- 63.37%

PROJECTS

Alertrak

It's an allergy matching app. Users can store their allergy, and medical condition list inside the app. When they buy any product they can scan barcode and see the result (against product ingredients and allergy list). It will also suggest to you the available alternative product. Also, the user can search the item and add it to the shopping list.

Technologies Used: Angular 6,NodeJS,ExpressJS,Mysql,Sphinx,Google Vision API,AWS(EC2, RDS, S3, ELB, CloudFront,Lambda, Reddis).

Brilliant Search

It's a business intelligence and data consultancy focused on the world of higher education.

Technologies Used: PHP,Angular 6 ,NodeJS,ExpressJS,Mysql,AWS.

Deal-Connect

It's a real estate app. There are two types of user Buyer And Seller. Seller will make a post with the property details.

The buyer can see the property and if they are interested they can contact the seller.
There are different Plans for sellers and buyers. As per their plan, they can make a post or see the post.

Technologies Used: Angular 6 ,NodeJS,ExpressJS,MongoDB

Windshield

It's a glass repairing app. There are two types of uses, Salesperson and repair person. The salesperson will visit the customer and make a request to the admin.

Admin will schedule a job for a repair person and the repairperson will visit the customer and finish their job.

Technologies Used: Angular 6 ,NodeJS,ExpressJS,MongoDB

Rito Ride Sharing

It's a ride-sharing app (like sRide). There are two types of user, Car owner(driver) and passenger(user).

From the Driver app, the driver can add their car(Multiple cars adding option is there) and publish their root along with the date, time and seat availability.

From the User app, Users can search along with there source, destination, date and time. They can send a request to the driver(Search result) for booking. If the driver accepts a request, the user can share the ride with that driver

Technologies Used: Angular 6 ,NodeJS,ExpressJS,MongoDB

E-commerce Shopping Carts

It's a simple e-commerce solution. Used Angular 6 to create the front end and Express js for creating API services, MongoDB as database.

Technologies Used: Angular 6 ,NodeJS,ExpressJS,Mongodb

Park24X7 Parking App API AND Backend

It's a parking app for a parking solution.which has real-time parking booking and management.

Technologies Used: PHP,Mysql,CodeIgniter,NodeJS
